Back End: ADO.NET, SQL, SQL Server, API

Tools: Visual Studio, Visual Studio Code, SSMS

Professional Skills: Troubleshooting, Critical Thinking, Communication, Project Management Fundamentals, Teamwork, Pair Programming

INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site: eric-faith.net** My personal portfolio site. This site was built using my knowledge in Html, CSS, JS, jQuery, bootstrap and MVC.
- **Small Business Project: Fed1StudioProject.eric-faith.net** Fictional small business site that offers instructional courses. Business and courses created by my personal experience of going back to school. Site was coded in VS, using HTML, CSS and Front-End Development.
- **Console Game Application:** C# Fundamental console game built with linear progression of a character through rooms that faces a challenge to complete.
- **Ecommerce StoreFront**: **storefront.eric-faith.net** Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators have the ability to manage product, category, and vendor data.
- **React Application**: **ASP.Net Web API**: **todo.eric-faith.net** This is a single page, web service application using a React Library. Built a .NET Web API project that has full CRUD functionality and a functioning React application.

- **Class Project:** As a whole class, we built this site for a real life client that is running for School Board Council. This is a full-stack project that was discussed, planned, broken down and executed as a class.
- **S.A.T. Scheduling Administration Tool: sat.eric-faith.net** Created a secure application for managing product data. Application is built to simulate an online class scheduling system. Administrators will have the ability to manage students, courses, scheduled classes, and enrollments.
